

VINOD

DevOps & Cloud Engineer

jbvinodvinod@gmail.com | +91 91104 87481 | [LinkedIn](#) | [GitHub](#) | Bangalore, India

SUMMARY

Cloud & DevOps Engineer with 3.5 years of IT experience across AWS, Linux, Docker, Kubernetes, Terraform, and CI/CD. Proven track record automating infrastructure, cutting deployment times, and resolving critical production incidents. Seeking a Cloud/DevOps Engineer role to build reliable, scalable, and secure systems.

SKILLS

- **Cloud & Infrastructure:** AWS, Terraform, Linux (Ubuntu)
- **Containers & Orchestration:** Kubernetes, Docker, Helm, Amazon EKS
- **CI/CD & Automation:** GitHub Actions, Jenkins, ArgoCD, Maven, Gradle, Ansible
- **Monitoring & Observability:** CloudWatch, Prometheus, Grafana
- **Version Control & Networking:** Git, GitHub, GitLab, VPC, ALB/ELB, Route 53, Security Groups, NAT Gateways

EXPERIENCE

DevOps Engineer — Meesho | Bangalore | Aug 2025 – Jul 2026

- Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions for multiple engineering teams, improving deployment consistency and reducing manual intervention.
- Managed Kubernetes-based application deployments across development, staging, and production environments while supporting release management activities.
- Developed reusable Terraform modules that standardized infrastructure provisioning across projects and environments.
- Strong experience in AWS and AWS networking, such as VPC, load balancing, compute, and IAM.
- Implemented monitoring and alerting solutions using Prometheus and Grafana, enhancing visibility into infrastructure and application health.
- Participated in production support and root cause analysis activities for critical customer-facing applications.
- Worked on AWS optimization initiatives by identifying underutilized resources and improving overall cloud resource utilization.
- Automated operational tasks using Python and shell scripting, reducing manual effort for routine activities.
- Worked with Docker and Kubernetes to support application containerization, deployments.
- Integrated vulnerability scanning and security validation into CI/CD workflows in collaboration with security teams.
- Supported modernization initiatives involving application containerization and Kubernetes adoption.
- Created and maintained technical documentation, deployment guides, and operational runbooks.

System Engineer — Hevo Data | Bangalore | Jul 2024 – Aug 2025

- Managed cloud infrastructure supporting customer-facing applications running on AWS.
- Built and enhanced Jenkins pipelines to improve release efficiency and deployment reliability.
- Provisioned infrastructure with Terraform and contributed to Infrastructure-as-Code adoption initiatives.
- Supported Kubernetes clusters and Docker-based workloads across multiple environments.
- Implemented monitoring dashboards and alerts to improve operational visibility and system health tracking.
- Participated in incident management and service restoration efforts during production outages.
- Supported backup, recovery, and disaster preparedness activities for critical systems.
- Assisted with cloud migration projects involving legacy workloads and infrastructure.
- Collaborated with developers, QA teams, and architects to support application delivery and deployment activities.
- Contributed to operational excellence initiatives through process improvements, automation, and streamlined workflows.

Tech Support Engineer — Visa | Bangalore | Mar 2023 – Jul 2024

- Resolved complex technical issues swiftly to minimize downtime and ensure seamless daily operations.
- Delivered high-quality, user-focused technical support with emphasis on effective communication and rapid resolution.
- Applied core networking knowledge — IP addressing and connectivity troubleshooting — to maintain stable local network environments.
- Diagnosed and resolved connectivity issues involving DNS, DHCP, and VPN configurations to ensure seamless remote work capabilities.
- Leveraged system monitoring tools to proactively identify hardware failures and performance degradation before they impacted end users.

EDUCATION

Bachelor of Computer Applications (BCA) — Visvesvaraya Technological University

CERTIFICATIONS

Ultimate AWS Certified Solutions Architect 2026 | Ultimate AWS Cloud Practitioner CLF-C02 | Linux for DevOps and SRE Engineers
